

AgriStrip

The rapid one-step assay.

Fast. Reliable. Easy. Cost effective.

The rapid one-step assay AgriStrip, developed and manufactured by BIOREBA, is based on lateral flow immunochromatography and is very fast. The test has been developed to confirm the presence of a plant pathogen in samples with suspicious symptoms. Such a sample is homogenized and a few drops of the homogenate are transferred to a cuvette. The strip is dipped into the extract and the result can be read within a few minutes. A positive result is seen as a colored band at the test line, whereas the colored band at the control line should always appear. Test strips can be kept as permanent records.

The performance of the test is very easy and there is no need for special laboratory equipment. Therefore, the AgriStrip is especially suitable when testing is required on-site, such as in greenhouses or fields.

AgriStrip formats

AgriStrip Complete kit	25 assays
AgriStrip Single strips*	25 assays
AgriStrip Single strips*	100 assays

* incl. ready-to-use extraction buffer

Content of the Complete kit

- Strips packed with desiccant bags 25
- AgriStrip Extraction buffer, ready-to-use 100 ml
- Disposable pipettes 25
- Extraction bags Universal 25
- Disposable cuvettes 25
- Cuvette rack 1

Note: The homogenizer hand model is optional and not included in the Complete kit.

Ordering information for optional products

Description	Art. No.	Size
Cuvette rack, holds 12 cuvettes	2166	1
Cuvettes, disposable	2534	100
Pipettes, disposable	2292	500
Extraction bags Universal	430100	100
Homogenizer hand model	400010	1
